

Latitude Trailer Park competition

Tiny Trike Tours

This is a Tricycle home for little people, and potentially a wood carrier.

We're a forest school based in Holton, Halesworth (<https://kindaforestschool.wordpress.com/>) and we'd like to renovate our tricycle to carry us small people to Latitude and at the same time be a mascot and advocate for Forest School. In the longer term we'd like to use the Trike to carry wood.

With the project led by one of our tribe, Lewin, and with David the volunteer, we've restored the working parts of the Trike (which for far too long laying abandoned in a corner of our woodland), and it's very popular with the kids.

We've built a garage for the Trike - it's a bender made out of hazel which we've covered with a tarp

We've started painting the wood, in preparation for our woodland scene.

We have a few artists amongst us who are sketching up the woodland scene to paint on the sheet metal cover. We've primed the wood outside and inside in preparation.

We've had some astro turf laid on the inside.

We'd like to make an additional trailer for the Trike to pull, and we've got a metal welder who could help us - one of his children attends our forest school. Our plan is to use 4 old bicycle wheels supporting a metal frame, lined with oak boards (oak from our wood) .
