

KE SUPPORTING THE CHILD

Kinda Education recognises that every child needs different support. Our supporting the child policy is intended to achieve the best possible care for a child's development.

Procedures to implement the policy include:

- Providing clear communication with the child's parent or carer including a letter and regular invitations to provide feedback
- Collecting relevant contacts and key health care information
- A support plan based on the 'Ideas to help me have fun in Kali Woods' form

The template letter and forms are on the following pages.
